Corporate Overview

Environmental Construction

Services, Inc. is a full service environmental contractor offering industrial, commercial, governmental, and educational owners and property managers safe and comprehensive management of their **asbestos abatement** response actions. In addition, through our centrally located corporate office in Madison, Wisconsin, we have the ability to respond **24 Hours a day to virtually any asbestos related emergency response issue whether it be large or small throughout the state.**

Our company policy provides for the employment of **experienced supervisors and technicians, licensed and trained in accordance with USEPA, WI-DNR, WI-DHFS, and OSHA regulations.**

Fully insured by an "A" rated **occurrence-based insurance carrier** rated by "Best Review", our internal controls and maintenance of "state of the art" equipment and experienced technicians, insures our continued ability to offer our customers some of the best protection from liability in the business.

We offer timely response to your environmental needs and would appreciate the opportunity to demonstrate our abilities to provide **prompt, cost effective, and responsible solutions** to your project requirements.

Facilities/Services

TYPES OF FACILITIES

Environmental Construction Services experience includes work in the following types of facilities:

1. Hospitals (Member of the Wisconsin Healthcare Engineering Association)
2. Commercial
3. Industrial
4. Educational
5. Governmental & Municipal
6. Food Processing
7. Residential

ASBESTOS AND MOLD REMEDIATION

1. Emergency Response 24 Hours a day 7 days per week

Stabilization, clean-up and repair of asbestos spills that occur accidentally on project sites or within a facility.

Emergency asbestos removal on broken or malfunctioning facility components.

Containment, removal, encapsulation and thorough cleaning of surfaces on which mold growth has occurred.

Any project that our customer feels is an emergency.

2. Planned Projects

Containment, removal, thorough cleaning of surfaces, and encapsulation where asbestos materials were applied or where contamination was the result of deterioration of the asbestos material, renovation of specific components or the normal use of the area.

Examples of potential locations where asbestos and mold contamination may occur:

- A. Asbestos insulation on piping, ductwork, boilers & equipment
- B. Asbestos vinyl floor tile and mastic, sheet vinyl flooring
- C. Asbestos spray-on fire proofing
- D. Asbestos acoustical materials such as ceiling tiles, sound proofing products
- E. Asbestos transite panels, siding, roofing, wallboard, laboratory tops, and exhaust hoods
- F. Asbestos encased fire doors
- G. Asbestos gasket material
- H. Asbestos paper on ductwork, electrical insulation
- I. Mold growth on components in commercial buildings, residential, and construction sites due to water damage.

SAMPLE ANALYSIS

Environmental Construction Services employs State of Wisconsin Licensed Asbestos Inspectors. If tests to confirm the presence of asbestos are required, we can take bulk samples, have them analyzed by a third party laboratory, and submit them to the owner.
